General Meeting

Schedule 2017

Mar. 29- 4Wall Entertainment in Moonachie
Presentation-by our host

Apr. 26- Summit
No Vendor Presentation

May 31-June 2
 JAG Conference
 Hyatt, Morristown, NJ

June 2
 8:00am Networking Breakfast

Jun. 14- West Milford
No Vendor Presentation

Sept. 27- Varto Technologies in East Rutherford
Presentation-by our host

Oct. 25- Scotch Plains
Presentation- TBD

Nov. 21, Tuesday- Edison

Your Municipal Communication Resource

Connecting Your Town to Your Residents

Ladies and Gentlemen, Boys and Girls, and children of all ages! Let's get ready to visit one of the greatest shows in the access world!

It will amaze you! It will bedazzle you! It is the 2017 Power of Partners Conference!

Come and visit the trade show floor where over 50 vendors will display their wares for you to see and learn about. Partake in the workshops and hear for yourselves the latest in legislative decisions, station best practices or production tips.

And if you act right now, you could find a great savings if you register by the end of March. For those of us with tight budget restraints, you will find the savings a fantastic benefit.

In Educational and Municipal Government, your ability to find ways to save money, is not only appreciated, but insisted upon. Not only can you save them money. Just think of the abundance of knowledge and information you will be able to bring back to your station to help steer it into the future.

Plus you will be given the opportunity to examine the newest equipment being used in our industry today.

This knowledge is what will make you an asset to your Access Station!

Get all the conference details and updates at www.powerofpartners.org

Early Bird discount rates end March 31, 2017.

Click POP button to register.

***Important! Be aware you can only use an email address once and you cannot make any changes to your reservation after you click on continue.*

Drone Technology Advances While Regulatory Frame Remains Uncertain Feature

By Brandon Dittman, of counsel, Helmer, Conley and Kasselmann, P.A.

Unmanned aircraft systems (UAS) or “drone” technology is becoming more ubiquitous with each passing day. At this year’s Super Bowl Lady Gaga performed with drone “back-up dancers,” Aaron Gordon of the Orlando Magic used a drone to help perform his NBA All-Star Game dunk in February, and late last year Amazon and Chipotle began the first government sanctioned drone delivery trials. While the advance of drone technology has been relentless, the promulgation of federal regulations to govern their use has been a slow trickle at best.

Local Government as Users of UAS Technology

On August 29, 2016, the Federal Aviation Administration (FAA) promulgated the first operational rules for commercial use of small UAS, widely known as the “Part 107” rules for the section of the Code of Federal Regulations under which they fall.¹ The Part 107 rules govern most non-hobby drone applications including cable channels for public, educational, and government (PEG) programming and non-police and fire municipal operations. Part 107 requires operators to become certified as a remote pilot in command (the UAS equivalent to a pilot’s license) and to register all UAS aircraft with the FAA. A Part 107 authorization allows UAS operation with a number of limitations including restrictions on maximum altitude, airspeed, “beyond line of sight” operations, “swarming,” autonomous operations, and operations over people.

While the Part 107 rules provide a number of clarifications on the processes and procedures for municipal UAS operations, significant questions remain. We have yet to see regulations governing operations over people. One of the key benefits of UAS technology is to be able to hover over crowds for photography or survey purposes cheaper and more quickly than traditional means. However, as a widely shared video of a drone nearly crashing into world champion skier Marcel Hirscher at an international ski federation world cup event has proven, UAS operations over people can be extremely dangerous without proper

precautions.² Under Part 107, organizations may request a waiver under Part 107 to fly over people on a per occurrence basis. The waiver process requires a highly detailed submission to the FAA and must demonstrate compliance with FAA Performance Based Standards for Part 107 Waivers.³ This cumbersome system of per occurrence waivers is not ideal, particularly when trying to respond to or cover unplanned events such as protests or disasters. Because of the burden of this process, as of the date this article was submitted, only 318 Part 107 waivers have been granted, mostly for night operations.⁴ The FAA was set to release a notice of proposed rulemaking (NPRM) in early 2017, specifically on the subject of operations over people. However, the transition to the Trump administration has thrown the future of the operations over people and all other drone regulations into question. This concern was highlighted in a recent letter from the Commercial Drone Alliance (which includes members such as Google and CNN) to the Office of Information and Regulatory Affairs stressing that the Administration’s recent Executive Order (EO) on Reducing Regulation and Controlling Regulatory Costs (the so called “two for one” regulatory EO) would only serve to *increase* the regulatory burden on drone operators if it were used to stop burden-easing regulations such as the operations over people NPRM from being promulgated.⁵ Given the current regulatory uncertainty, municipal UAS operators are encouraged to strictly comply with Part 107 or their Public Certificate of Authorization (if applicable)⁶

⁶ Instead of complying with Part 107, public entities may also apply to the FAA for a blanket public Certificate of Authorization (COA) which allows flights at or below 400 feet in Class G airspace nationwide, self-certification of the UAS pilot and the ability to obtain emergency COAs under special circumstances. In most instances Part 107 will be less burdensome to operate under, however, police and fire operations may benefit from a public COA.

Local Governments as Regulators of UAS Technology

The ability of local governments to regulate drones is even less clear than the ability to operate them. During the development of the Part 107 rules, many urged the FAA to preempt all state and local regulation of drone activity. Instead, the FAA's final rule stated that the agency was "not persuaded that including a preemption provision in the final rule is warranted at this time," concluding that "certain legal aspects concerning small UAS use may be best addressed at the state or local level."⁷ However, the FAA has provided little guidance on what

kinds of local regulations of drone activity are permissible. This is coupled with the fact that a recent statute, H.R.636 - FAA Extension, Safety, and Security Act of 2016, contains provisions which create a petition process by which entities may petition the Department of Transportation (DOT) to designate certain locations as off limits to drones. These provisions appear to preempt the ability to place location-based bans on drones.

The absence of clear federal rules has not stopped localities from stepping into the void, and these local attempts to regulate will likely lead to a more definitive picture of what is permitted under federal law. On January 23, 2017, the Orlando City Council passed Ordinance No. 2016-87, a comprehensive drone regulatory scheme. The ordinance restricts drone use within 500 feet of city-owned parks, schools and venues. Drones are also restricted within 500 feet of gatherings with more than 1,000 people. The ordinance creates a series of permitting obligations for drone use and provides for civil and criminal penalties for unsafe operations as defined by the City. Given that the federal government has already "occupied the field" on subjects such as the location of drone operations, permitting schemes, and operations over people, and the Orlando ordinance creates city-specific standards that go beyond federal law in their reach, if the Orlando ordinance is challenged, it will likely be found to be preempted, at least in part.

In contrast, the City of San Diego is considering an ordinance drafted in coordination with the FAA specifically to avoid federal preemption. In essence, the San Diego ordinance creates local enforcement mechanism for compliance with FAA standards on safe operations including operations near airports and emergency responders. The drone advocacy group Academy of Model Aeronautics has hailed the ordinance as sensible, rare praise from an organization which generally opposes local regulation. The contrast of the Orlando and San Diego ordinances provides a helpful example for local governments considering regulating drones. First, local regulators should always consult with the FAA before passing new regulations on drone activity. Second, regulations that are unlikely to be preempted are those that focus on traditional state and local police power (such as land use, planning and zoning, health, safety, advertising, general welfare) and those that provide a local enforcement mechanism to enforce FAA standards.

While the number and diversity of drone-based applications is ever growing, regulatory uncertainty regarding their use persists. The FAA has created a Drone Advisory Committee (DAC) to assist it, in part to define the roles and responsibilities of federal, state, and local governments in regulating and enforcing drone laws, and it met for the first time last September. Unfortunately, of the DAC's 35 members there are only two representing local government interests – San Francisco Mayor Lee and former Riley County, Kansas Commissioner Robert Boyd. Given this regulatory uncertainty at least in the short term, local governments must stay abreast of the federal regulatory changes which will eventually come, and tread carefully, both as operators and regulators of drones.

FAA Certification for Commercial Operations requires that drone operators successfully pass the 14 CFR Part 107 Aeronautical Test. The Jersey Access Group has teamed up with certified flight instructors to provide a two-day training course for municipal employees, May 30 and 31, 2017 at the Hyatt Regency Morristown, NJ. To learn more contact jaginfo@jagonline.org. Registration is limited.

(This article will be published in the April issue of NJLOM Magazine. Mr. Dittman is part of the team that is now representing JAG.)

What a Difference a Year Makes

Tec Talk

by Paul Distefano, Account Executive Sales, 4Wall Entertainment

At just about this time last year, I was happily wearing multiple hats at Shadowstone ...juggling multiple projects, making plans for three upcoming trade shows, and most likely, replying to Rich Desimone's frantic e-mails asking me where the heck my article for the March newsletter was. Jump forward one year and Shadowstone is no more. I find myself here at 4Wall Entertainment still juggling projects, wearing a couple fewer hats, but much to Rich's chagrin, still needing to be prodded at the last minute to send in my article!

This month, I look forward to hosting the JAG monthly meeting here in Moonachie. I hope you all decide to make the trip up so you can see our, *somewhat*, larger facility and get a feel for what we have to offer. The first thing you will notice is that I won't set you up in the warehouse! You will be much more comfortable in our 40' x 60' demo room.

While all of us who came over to 4Wall with the acquisition miss the old place, we are excited about the additional resources we have to offer our clients. The extensive experience we had in lighting for TV, Film, and Media in general augments 4Wall's extensive experience in theatrical and architectural lighting systems design & integration. 4Wall's New Jersey facility is over 120,000 square feet in size and I look forward to giving you all a tour after the meeting. I am certain that you will be impressed with what you see. By the way, come July, we will be moving into a new facility around the corner, which is over 200,000 square feet!

At Shadowstone, our small size allowed us to do our best to service our customers on a personal level, making them partners, integral in the design process of their particular system. It was assuring to me that, although a much larger organization, 4Wall shared the same philosophy when it comes to customer relationships. 4Wall's tag line, "*Large Enough to Service... Small Enough to Care*" is put into practice daily. Our talent pool of resources, support, rental inventory and service reaches from coast to coast with seven facilities around the country.

From the largest project to the smallest event, you will receive the dedication, quality and expertise which have become the foundation of 4Wall. Our main objective is to enable our customers to reach their goals.

We offer extremely valuable support based on the collective strength and industry experience of our sales and support teams. We vow to provide impeccably maintained equipment that is appropriate for our customers' needs. From maintaining our automated fixtures with certified technicians, to cleaning and testing each piece of cable after every show, we go the extra mile to ensure the equipment you rent or buy from us is rig ready each and every time.

Our 4Wall Systems and Design division can provide custom turnkey system integration for projects of any size. From design and custom fabrication to project management and installation, 4Wall Systems has the experience to make your studio, theatre, church, or other project a work of art.

Our e-commerce sites UsedLighting.com and NewLighting.com offer a huge selection of equipment from the industry's top brands. Since 1999, UsedLighting.com has provided a safe place to buy and sell used lights, consoles, truss, LEDs, and more. NewLighting.com features brand new equipment and expendables from leading brands in the industry.

So, again, we look forward to hosting you on the 29th.... and we have a little surprise for you when you get here. In the past, I have spoken with several JAG members who have struggled with remote lighting needs which, sometimes, needs to bridge the gap between lighting for the camera and lighting for the eye. Back in October, at the NAB New York show, I was introduced to a new fixture by one of my vendors. I immediately thought that this was the perfect light for my friends in JAG. That day, in our little 10x10 booth, we discussed the feasibility of putting together a kit that I could offer at a special price to the members of JAG. Since then, we have had several phone conferences and come up with what I believe is a great kit for your needs. I don't want to say more and spoil the surprise, but just know that the kit will consist of three lights, stands, Gold Mount adapters, a softbox, in a small, lightweight wheeled Pelican case. When you see what these lights can do, you will be very impressed! The manufacturer and I have put together a special price, specifically for the JAG membership. The light will not be introduced to the rest of the industry until NAB, so you will have the first chance to see them.

I know..... I am such a tease!

Thanks for the help!

Volunteerism

Rich Desimone, Chair, External Relations

The External Relations Committee is looking for a new chair. This position includes a seat on the executive board. This will end my 16 years as chair. I will be available to help to make the transition as easy as possible. Those interested should contact me.

Conference Committee welcomes Ed Cologna and Geoffrey Belinfante.

Join a committee.

Executive- Meeting Mar. 15 @ 12NOON	Production- No Meeting Scheduled	Membership- Meeting Apr. 6 @ 2:30pm

Bits & Bytes

- Mar. 29 — General Meeting will be held at 4Wall Entertainment. Membership vote on budget and adding two trustee positions to the board of directors. Discussion on the management of JAG and the need for chairs to head up External Relations, Conference, JAG Awards, and Marketing committees in 2018. Paul Distefano will be showing many new lighting fixtures and provide a tour of this very large facility.
- April 3 — Conference Committee meeting
- Apr. 5 — Executive Board Meeting-Discuss contract services and action plan update.
- Apr. 6 — Membership Committee meeting
- Apr. 24-27 — NAB
- Apr. 26 — General Meeting will be in Summit. No vendor presentation
- May 1,8,15,22,29 Conference Committee meetings
- May 3 — Executive Board Meeting-

Join NATOA Help build JAG's position in NATOA

JAG Members,

As you know JAG has been the NJ Chapter in the NATOA (National Association of Telecommunication Offices and Advisors) for the past 5 years. Our membership in NATOA has kept us informed of technology trends both helpful and destructive to our stations so that JAG frequently emerges as a leader in various technology issues.

NATOA has listened to our chapter and the needs of its members here in New Jersey. To that end for the past 3 years I have been in opposition of NATOA's membership structure and looking for a way to make a membership for the average station in New Jersey affordable.

They listened, and they have added a program for new members. The cost is \$100 for populations under 10,000 and \$200 for those under 20,000. (they also include an assessment of \$375 which is not required as it is for the Legal and Legislation Action Form which towns cannot support).

This pricing is good for two years and then you would pay the normal rate (which I know no one will pay). But it is a start. So, let us look at how we can make this work. The more of you that join the better position we will be in to make them continue this program, with maybe a possible modest increase. This is the power you have and I will need to keep up this fight for a fair membership rate.

You may be wondering why you should join NATOA. You would look at the membership benefits and you might say that JAG is providing me with all the information I need and I have little interest in any other services. Well that answer does not work because without your support of NATOA there will be no flow of information to JAG for you to take to your Mayor or Administrator.

NATOA is very well positioned in the FCC and everyone on the hill knows this organization. The new FCC chairman is not expected to be friendly to our needs. The issues of 5G/Small Cells is going to be a challenge as it relates to the use and fees for your town's right of way. Another is the requirements to provide closed captioning that can strangle operating budgets. There are also all the issues surrounding flying drones around your town.

We need NATOA to be fighting for us and we also need NATOA to hear our concerns in NJ and support and protect us.

I ask that you click on the link

<https://www.natoa.org/web/assets/ckeditor/filemanager/Uploads/SmallAgencyPromoMemberApp2017.pdf>

And have your town become a member of NATOA.

Call me if your population is over 20,000. Rich

Drone Certified Training

May 30 & 31, 2017, 8am-5pm, Hyatt Morristown

Pre-registration Exclusive to JAG Members

Opens to the public April 1, 2017

Jersey Access Group offers this training to assist municipalities in the use of this new technology by many departments for a variety of purposes to support their operational needs.

Course instructor is a Certified Flight Instructor (CFI) with a 95% success rate for attendees acquiring FAA certification for Commercial Operations under 14 CFR Part 107.

EXTERNAL RELATIONS COMMITTEE: *Rich Desimone, Chair*

We are working with 4Wall on introducing a new lighting package exclusive to JAG members. We are finishing up plans to offer drone certification training on May 30 & 31 with special pre-registration for JAG members. Seven of our nine organizational members have renewed their membership. We are reaching out to additional vendors to join JAG. To join the committee, contact Rich Desimone at rjdesimone@verizon.net.

FINANCE COMMITTEE: *Debbe Gist, Chair*

All of the 2017 invoices have been mailed out. If you prefer to receive your invoice via email, please contact me. If you are interested in joining the Finance Committee, please contact me – dgist@piscatawaynj.org 732-562-2305.

PRODUCTION COMMITTEE: *Peter Namen, Chair*

NO REPORT If you would like to help please contact me at pnamen@jagonline.org.

AD HOC COMMITTEES

Legislation Committee: *Dave Garb, Chair*

The Legislative Committee needs your eyes, ears and contacts in order to keep JAG up to date with the latest information on all subjects that could be of interest to the access community.

Please help us keep an eye on these issues that may have a direct impact on you and your stations operations by joining the Legislative Committee. Remember, your eyes, ears and contacts are greatly needed in keeping JAG up to date with the latest information on not just this matter, but all subjects that could be detrimental to us all. If interested, please contact me at: davegarb@paps.net.

Membership Committee: *Stephanie Gibbons & Cindy Hahn, Co-Chairs*

The JAG membership survey has just closed and we received 46 responses and want to thank everyone that participated. We will be looking at all the information and plan to report out on the results in the next few months. Just a reminder that if any of your contact information or personnel has changed in the last six months please let us know so we can update our records and make sure the JAG correspondence and information is going to the right place and right person. Send any changes to Stephanie Gibbons at stgibbons@verizon.net. If you are interested in joining this growing team please contact: Stephanie Gibbons at stgibbons@verizon.net

Conference Committee: *Rich Desimone, Chair*

Our next meeting is Apr. 3 at 2pm. A number of workshops are in place. We will be continuing to work on Affinity lunch topics. We plan to have the list out in April. We are adding a lighting pavilion to the trade show floor to include a comprehensive look at the newest fixtures just released at NAB. Contact me if you would like to join an amazing team of dedicated people, at rjdesimone@verizon.net.
